BEYOND THE PLAN

Leading People, Projects & Change with the Right Delivery Approach

Different Challenges. Different Approaches. One Purpose — Greater Value.

Plan Wisely
Lead People
Enable Change
Deliver Value
Build for Generations

Context determines the approach. Value determines success.

1 THE DELIVERY PERSPECTIVE

The right approach starts with the right understanding.

Understand the Need → Assess Context & Uncertainty → Select & Tailor the Approach → Empower the Team → Deliver Value

"The process should support the outcome; the outcome should never be forced to fit the process."

2 ONE DESTINATION – DIFFERENT DELIVERY PATHS

Same goal. Different routes. Chosen by context.

PREDICTIVE (Plan-Driven)	ADAPTIVE / AGILE (Value-Driven)	HYBRID (Best of Both)
Define requirements	Evolving requirements	Governance & control
Stable scope	Frequent feedback	Flexibility & iteration
Controlled planning	Incremental delivery	Context-based tailoring
Milestones & governance	Continuous learning	Integrate & optimize
Plan → Execute Control → Deliver	Prioritize → Deliver Review → Learn → Adapt	Plan + Govern + Iterate Adapt → Integrate

THE RIGHT APPROACH IS THE ONE THAT FITS THE WORK.

3 A REAL-WORLD STORY

When one approach is not enough.

- Infrastructure deployment (predictive planning)
- Equipment integration (controlled execution)
- Configuration & optimization (adaptive iteration)
- Overall governance (hybrid leadership)

"Maturity is not choosing between discipline and agility. It is knowing where each creates value —and integrating them without losing accountability."

4 AGILE – A MINDSET BEFORE A MECHANISM

Practical principles that drive better outcomes.

- **VALUE FIRST** — Focus on what matters
- **COLLABORATE** — Bring people closer to the work
- **DELIVER INCREMENTALLY** — Create useful progress
- **WELCOME FEEDBACK** — Treat feedback as information
- **ADAPT** — Respond intelligently
- **IMPROVE CONTINUOUSLY** — Make each cycle better

"Agility is not the absence of discipline. It is disciplined responsiveness to change."

5 WHERE SCRUM ADDS VALUE

A simple framework for iterative delivery.

Transparency. Collaboration. Learning. Better Value.

6 PEOPLE – WHERE DELIVERY BECOMES HUMAN

Great results come from great people.

- **LISTEN** — Understand perspectives
- **CLARIFY** — Align on objectives
- **EMPOWER** — Give responsibility
- **SUPPORT** — Remove blockers
- **TRUST** — Build confidence
- **ACCOUNT** — Own outcomes together

"My responsibility as a leader is not to have every answer. It is to create an environment where capable people can ask the right questions, speak honestly, make responsible decisions and succeed together."

7 ETHICS ABOVE METHODOLOGY

Methodologies guide how we deliver. Ethics determine how we lead.

METHODOLOGY CAN BE TAILORED. ETHICS CANNOT.

8 FROM OUTPUT TO VALUE

Finishing the work is important.
Realizing why the work mattered is leadership.

"Project completion is important. Value realization is leadership."

9 MY ADAPTIVE LEADERSHIP MODEL

Purpose-driven. People-centered. Value-focused.

Choose the approach that fits the challenge.
Empower the people who deliver it.
Govern responsibly. Learn continuously.
Measure success by value created.

10 A HUMAN-CENTRED FUTURE

As our tools become more intelligent, our leadership must dheonge more human.

11 GREATER IMPACT

Stronger teams. Better networks. Brighter communities.

"Be the light that serves, transforms, and ignites greatness for generations."
